

# Handy Guide - Thermos Airpot

Please be careful: That you dont burn yourself when filling or emptying the thermos airpot.

## Step 1:

Open up the thermos  
Pushing the two buttons  
Inwards to open the top  
Lid.

## Step 2:

Lift the lid, which will  
Stay open by the hinge  
At the back.

## Step 3:

Lift out the insert, which  
And place to one side.

## Step 4:

Fill up with hot water,  
Do not fill to the top, leave  
At least 1" (25mm) air  
Space.

## Step 5:

Replace the insert back  
Into the thermos, making  
Sure that the spout is  
Sitting in the centre of  
Outlet.

## Step 6:

Close the lid making sure it  
Has locked in place. Lift the  
Top lever until it stays  
upright. It is now ready  
for use.

## Step 7:

Place the cup under the  
Spout outlet and push the  
Lever down to let out the  
Hot water. You may need  
To push the lever down  
Multiple times to fill the  
Cup.

## Step 8:

Once finished, empty thermos  
Of hot water. Open the lid,  
remove the insert. Push the  
clip inward at the hinge, this  
will allow you to lift the lid and  
Remove to make it easier.
