

## Safely Stacking Folding Chairs

**All the chairs should be facing the same way  
with the material going facing the trolley.**

As shown in image above.

These should be stacked on the **Top Bar**,  
stacking this let you get the trolleys into the main hall,

This also stops any of the chairs getting damaged  
by stacking them wrong way.

Any equipment that you use,  
please clean and return back to its locations.

**Thank you for your understanding and support.**
